DEPARTMENT OF HEALTH INFORMATICS AND INFORMATION MANAGEMENT

Health informatics and information management (HIIM) professionals provide the leadership necessary to provide quality information that supports clinical and nonclinical decision making in real time to the health-care industry. Transforming data into health intelligence while governing and respecting the privacy rights of patients and providers is a challenge all health-care delivery systems face. The profession aims to improve patients’ experiences with respect to quality and satisfaction, to improve the health of populations, and to improve the per capita costs of health care. Professionals trained in HIIM possess the necessary leadership; as well as the technological, administrative, legislative, analytical, and decision-making skill sets to ensure a competent workforce to the health-care industry.

Chair
Debra L. Hamada

Primary faculty
Pauline J. Calla
Jennifer L. Guerrero
Debra L. Hamada
Diana S. Medal
Braden Tabisula
Linda M. Palmer
Terri L. Rouse

Clinical faculty
Kimberly A. Caraig
Jere E. Chrispens
Marilyn H. Davidian
Audrey J. Shaffer
Brenda Muniz Taylor
Douglas F. Welebir
Mark E. Zirkelbach

Associated faculty
Noha S. Daher
Intithar S. Elias
Rodney Roath

Programs
• Coding Specialist — Certificate (http://llucatalog.llu.edu/allied-health-professions/coding-specialist-certificate)
• Health Informatics — M.S. (http://llucatalog.llu.edu/allied-health-professions/health-informatics-ms)
• Health Information Administration — B.S. (http://llucatalog.llu.edu/allied-health-professions/health-information-administration), Certificate (http://llucatalog.llu.edu/allied-health-professions/health-information-administration)
