Physical Therapy is a professional health-care field that focuses on the management of physical function and health status. Physical therapists provide services to patients/clients who have impairments, disabilities, or changes in physical function and health status as a result of injury, disease, or other causes.

Physical therapists teach patients how to prevent injury or disability and manage their conditions so that they will achieve long-term health benefits. They examine each individual and develop a plan, using treatment techniques to promote the ability to move, reduce pain, restore function, and prevent disability. In addition, physical therapists work with individuals to prevent the loss of mobility before it occurs by developing fitness- and wellness-oriented programs for healthier and more active lifestyles.

Physical therapists provide care for people in a variety of settings, including hospitals, private practices, outpatient clinics, home-health agencies, schools, sports and fitness facilities, work settings, and skilled nursing facilities. State licensure is required in each state in which a physical therapist practices.

In addition to the Associate in Science degree (PTA, found in the previous section of the CATALOG), the program options within the Department of Physical Therapy include:

- entry-level Doctor of Physical Therapy
- postprofessional Doctor of Physical Therapy
- Doctor of Science
- Doctor of Philosophy

**Programs**

- Physical Therapy — D.P.T. (Entry Level) ([http://llucatalog.llu.edu/allied-health-professions/physical-therapy/dpt-entry-level](http://llucatalog.llu.edu/allied-health-professions/physical-therapy/dpt-entry-level))
- D.P.T. (Postprofessional) ([http://llucatalog.llu.edu/allied-health-professions/physical-therapy/dpt-postprofessional](http://llucatalog.llu.edu/allied-health-professions/physical-therapy/dpt-postprofessional))
- D.Sc. (Postprofessional) ([http://llucatalog.llu.edu/allied-health-professions/physical-therapy/dsc-postprofessional](http://llucatalog.llu.edu/allied-health-professions/physical-therapy/dsc-postprofessional))
- Ph.D. ([http://llucatalog.llu.edu/allied-health-professions/physical-therapy/phd](http://llucatalog.llu.edu/allied-health-professions/physical-therapy/phd))

**Courses**

**PHTH 501. Neurology I. 3 Units.**

Physical therapy management of individuals with balance and vestibular disorders resulting in impairments, functional limitations, and disabilities. Emphasizes application and integration of theoretical constructs, evidence-based practice, examination, evaluation, diagnosis, prognosis, intervention, and outcome measurements.

**PHTH 502. Neurology II. 3 Units.**

Physical therapy management of individuals with neurological disorders (including stroke, traumatic brain injury, multiple sclerosis, Parkinson’s disease, Guillain-Barre syndrome, and amyotrophic lateral sclerosis) resulting in impairments, functional limitations, and disabilities. Emphasizes the application and integration of theoretical constructs, evidence-based practice, examination, evaluation, diagnosis, prognosis, intervention, and outcomes measurement.

**PHTH 503. Neurology III. 3 Units.**

Physical therapy management of individuals with spinal cord injury and amputations resulting in impairments, functional limitations, and disabilities. Emphasizes the application and integration of theoretical constructs, evidence-based practice, examination, evaluation, diagnosis, prognosis, intervention, and outcomes measurement.

**PHTH 504. Neurology IV. 3 Units.**

Continued development of critical thinking and refinement of previously learned neurologic patient management skills and introduction to new content supporting neurologic physical therapy practice.

**PHTH 505. Integrated Clinical Experience. 1 Unit.**

A year-long course that provides the students—assisted by faculty and clinical therapist—experience with mock and real patients. Emphasis is on critical thinking related to assessment, safety, and treatment progression. Course incorporates didactic education into practical application.

**PHTH 506. Exercise Physiology. 3 Units.**

Addresses physiologic, metabolic, circulatory, and structural adaptations, responses, and interactions that occur during acute and chronic exercise. Includes body fat analysis and risk of disease in the obese client. Applies tests and measures to concepts and applications of exercise prescriptions.

**PHTH 508. PT Communication and Documentation. 2 Units.**

Introduces principles and dynamics of professional communication. Emphasizes basic skills needed in a clinical setting, including but not limited to the following: evaluations, progress notes, discharge summary, workers compensation, prescriptions, patient interviews, letters of justification, electric formats, and legal considerations related to all aspects of the above.

**PHTH 509. Biophysical Agents. 3 Units.**

Fundamental principles, physiological effects, and application techniques in the use of biophysical agents, including thermotherapy, cryotherapy, hydrotherapy, ultrasound, and electrotherapy procedures. Manual modalities, including massage techniques, myofascial and trigger point release. Lecture and laboratory.

**PHTH 510. Kinesiology. 3 Units.**

Fundamental principles of joint and muscle structure and function related to the development of treatment strategies for the physical therapist. Analyzes and applies the biomechanics of normal and pathological movement of the human body. Functional anatomy of the musculoskeletal system, including palpatory techniques for bone, ligament, and muscle.

**PHTH 511. Clinical Orthopaedics. 2 Units.**

Addresses the physical therapist’s management of patients with functional impairments stemming from orthopaedic pathologies in all body regions. Introduces patient/client management; including, examinations, evaluations, diagnoses, prognoses, interventions, and outcomes. Emphasizes postoperative rehabilitation to enhance outcomes following orthopaedic procedures.
PHTH 512. Clinical Psychiatry. 2 Units.
Introduces mental and personality disorders. Reviews abnormal behaviors commonly found in a clinical setting.

PHTH 513. Therapeutic Procedures. 3 Units.

PHTH 514. Manual Muscle Testing. 3 Units.
Methods of evaluating muscle strength and function using specific and gross manual muscle tests. Integrates manual muscle testing with other aspects of patient care. Live patient demonstrations and discussion regarding each patient. Lecture, demonstration, and laboratory.

PHTH 516. Histology. 2 Units.
Surveys fundamental tissues (epithelial, connective, muscle, and nervous) and the histopathology of selected diseases, including changes in bone and cartilage.

PHTH 517. Movement Science. 2 Units.
An integrative approach to movement impairment and neuromuscular approaches in the evaluation and management of musculoskeletal pain syndromes. Identifies clinical reasoning and examination of movement patterns. Extensive laboratory practice with patient/case studies.

PHTH 518. Aspects of Health Promotion. 2 Units.
Dynamics of physical therapy involvement in health promotion for the individual and the community. Factors in the promotion of a healthful lifestyle, including cardiovascular enhancement, stress reduction and coping mechanisms, nutritional awareness, weight management, and substance control. Students design and implement community-based health education programs.

PHTH 519. Locomotion Studies. 3 Units.
Basic and advanced observational analysis of normal and abnormal human locomotion in adults. Compares differences in gait impairments at each joint and at different stance/swing phases. Use of assessment tools and clinical reasoning in the attributes and interventions of normal and abnormal gait characteristics. Basic pathological and soft tissue impairments to gait cycle. Correlates energy expenditure to gait.

PHTH 520A. Orthopaedics 1A. 3 Units.
Discusses physical therapy examination, evaluation, and interventions relevant to the clinical management of musculoskeletal conditions of the upper extremities. Presents instruction related to orthopaedic physical therapy interventions—including joint mobilization, hand splinting, and other selected manual techniques for specific upper extremity musculoskeletal conditions. Utilizes lecture, laboratory, and case studies to develop and integrate these concepts.

PHTH 520B. Orthopaedics 1B. 3 Units.
Students further develop concepts of examination, differential diagnosis, prognosis, and interventions that are expanded to patients with musculoskeletal conditions of the lower extremities. Utilizes lecture, laboratory, and case studies to develop and integrate these concepts.

PHTH 522. Orthopaedics II. 3 Units.

PHTH 523. Orthopaedics III. 3 Units.

PHTH 525. General Medicine. 3 Units.
An understanding of medical and surgical disorders for the physical therapist. Basic pathology and/or etiology and clinical manifestations. Medical treatment for conditions within selected specialties of endocrinology, arthritis, oncology, and integumentary management.

PHTH 526A. Cardiopulmonary I. 3 Units.
Anatomy and physiology of the cardiovascular system as applied to patient management. Physical therapy management of patients diagnosed with cardiac diseases and complications. Identifies disease processes, including definition, etiology, pathophysiology, clinical presentation, and the clinical course of cardiac conditions. Analyzes and examines ECGs of various forms with basic interpretation. Includes lecture and laboratory.

PHTH 526B. Cardiopulmonary II. 3 Units.
Normal anatomy and physiology of the pulmonary system as applied to physical therapy management. Medical and physical therapy management of patients diagnosed with pulmonary diseases and complications. Analyzes arterial blood gases in a systematic manner and relates findings to the disease and ventilatory process. Discusses PFTs for obstructive and restrictive diseases. Includes lecture and laboratory.

PHTH 528. Therapeutic Exercise I. 3 Units.
Introduces basic exercise techniques used in the practice of physical therapy. Techniques include, ROM, stretching/flexibility, joint mobilization, muscle performance (including strength, power, and endurance), and aquatic rehabilitation.

PHTH 530. Therapeutic Exercise II. 3 Units.
Formulation and implementation of exercise prescriptions based on impairments and protocols. Opportunities to design treatment progressions for the extremities. Emphasizes spinal stabilization approaches for the axial skeleton.

PHTH 532. Biostatistics I. 2 Units.
Fundamental procedures of analyzing and interpreting data. Sampling, probability, descriptive statistics, normal distribution, sampling distributions and standard error, confidence intervals and hypothesis testing, power, effect size. Introduction to epidemiological measures to estimate risk and select measures of clinical improvement.

PHTH 534. Soft Tissue Techniques. 2 Units.
Physical therapy evaluation and treatment-planning strategies for individuals with orthopedic dysfunction primarily related to soft tissue injury resulting in pathology, impairments, functional limitations, and disabilities. Emphasizes laboratory hands-on application and integration of theoretical constructs, evidenced-based practice, examination, evaluation, intervention, and measurement of outcomes.

PHTH 539. Integrative Physiology. 4 Units.
Physiology of the human body, including integumentary, skeletal, muscular, neuronal, cardiovascular, respiratory, endocrine, digestive, urinary, and reproductive physiology.
PHTH 540. Concepts of Acute Care. 2 Units.
Prepares students to assess, diagnose, plan, implement, and evaluate acute care interventions. Students learn strategies to differentiate between musculoskeletal and nonmusculoskeletal disorders. Highlights knowledge and skills related to screening for medical pathology.

PHTH 555. Medical Screening. 2 Units.
Emphasizes information gathering from history taking, review of systems, and directed questioning—combined with a focused examination to establish a working diagnosis. Emphasizes clinical pattern recognition for both musculoskeletal and nonmusculoskeletal disorders. Students learn strategies to differentiate between musculoskeletal and nonmusculoskeletal disorders. Highlights knowledge and skills related to screening for medical pathology.

PHTH 557. Pediatrics I. 3 Units.
Examine typical sequential human development observed throughout prenatal, infant, toddler, and childhood periods, in the context of physical therapy; and provides an introduction to atypical development. Emphasizes observation of motor development and learning, and identification and documentation of movement for both the typically and atypically developing child.

PHTH 558. Pediatrics II. 3 Units.
Discussion and demonstration of physical therapy diagnosis, assessment, and case management of clients with developmental disabilities including, cerebral palsy, spina bifida, and muscular dystrophy. Addresses pediatric NDT, sensory processing disorders, spasticity management, and adaptive equipment options. Includes preparing realistic, measurable objectives. Includes laboratory demonstrations.

PHTH 559. Geriatrics. 2 Units.
Overview of the normal and pathological changes seen during the aging process as related to physical therapy. Includes theories and demographics of aging, physiological and psychosocial changes, principles of geriatric rehabilitation, pharmacology, orthopedic considerations, fall risk, and fall prevention.

PHTH 561. Physical Therapy Administration. 4 Units.
Principles of organization and administration in health-care delivery. Multidisciplinary approach to patient management and patient-therapist relations. Administration of physical therapy services. Professionalism, medicolegal considerations, supervision and training of support personnel. Departmental design and budgetary considerations.

PHTH 563. Scientific Inquiry I. 2 Units.
Using the team-based learning approach, introduces students to the terminology, methodology, and skills needed to become efficient and critical consumers of published evidence. Teaches students the elements of focused clinical questions development, hypothesis development, study designs, sampling techniques, study variables, measurement, reliability, validity, threats to validity, and statistics as they relate to evidence-based practice.

PHTH 564A. Scientific Inquiry II A. 1 Unit.
Students learn the elements of evidence-based practice, how to balance evidence with patients’ preferences and clinical expertise, and how to become lifelong learners using evidence-based practice. Guided by a faculty advisor, students develop a focused clinical question; obtain, analyze, synthesize, and integrate evidence; and then evaluate outcomes related to the question.

PHTH 564B. Scientific Inquiry II B. 1 Unit.
Students create and submit a written systematic review of the evidence gathered and appraised in PHTH 564A Scientific Inquiry II A. Evidence-based practice experience culminates in a formal oral presentation of the findings to an audience of faculty and peers. Prerequisite: PHTH 563, PHTH 564A.

PHTH 566. Pathology. 4 Units.
Fundamental mechanisms of disease, including cell injury, inflammation, repair, fluid disorders, neoplasms; developmental, genetic, pediatric, immune, infectious, physical, dietary, blood, vascular, and heart diseases.

PHTH 567. Pain Science. 2 Units.
Integrates conceptual frameworks that address clinical transitioning from acute to chronic pain. Presents functional connectivity brain patterns related to pain signatures. Reviews functional MRI pain research related to clinical presentations of acute, chronic, and neuropathic pain, and pain-prone personality disorders. Applies a classification system for identifying chronic pain patients and introduces counseling management strategies.

PHTH 568. Integrative Neuroanatomy. 4 Units.
Basic anatomy and function of the central, peripheral, and autonomic nervous systems and related structures. Gross anatomy of the brain and spinal cord. Functional consideration of cranial nerves, tracks, and nuclei of major systems. Lecture, slides, and laboratory with specimens, models, and exercises.

PHTH 569. Clinical Neurology. 2 Units.
Introduces the practice of neurologic physical therapy. Emphasizes neurologic disorders routinely encountered by physical therapists and their clinical manifestations. Presents components of the neurologic physical therapy examination.

PHTH 571. Physical Therapy Practicum I. 1 Unit.
A two-week, forty clock hours per week, clinical education experience. Allows students to begin utilizing physical therapy clinical and professional skills learned during the first year of the DPT curriculum. Supervised by a licensed physical therapist. Includes direct patient care, as well as possible participation in specific site team conferences, demonstrations, special assignments, and observation.

PHTH 572. Physical Therapy Practicum II. 2 Units.
A four-week, forty clock hours per week, clinical education experience. Students apply and practice knowledge and skills learned in general medicine, neurologic, orthopedics, and preventive care/wellness as they relate to patients across the lifespan. Supervised by a licensed physical therapist. Includes direct patient care, as well as possible participation in specific site team conferences, demonstrations, special assignments, and observation.

PHTH 573. Physical Therapy Practicum III. 1.5 Unit.
Third in a series of three practica. Provision of direct patient care during full-time clinical placement and participation at acute, outpatient, neurorehabilitation, orthopedics, geriatrics, pediatrics, sports medicine, or wellness/preventive care settings. Offered Summer quarter of the third academic year.

PHTH 575. Orthopaedics IV. 1 Unit.
A three-quarter course that integrates examination procedures taught in the orthopaedic curriculum. Culminates in a comprehensive laboratory practical that includes the five elements of patient/client management, as described in the Guide to Physical Therapy Practice: examination, evaluation, diagnosis, prognosis, and intervention.
PHTH 586. Orthotics and Prosthetics. 2 Units.
Clinical reasoning in the attributes and interventions of normal and abnormal gait characteristics based on the field of orthotics and prosthetics. Instruction with various types of orthotics and prosthetics in order to collaborate with O&P clinicians and patients in locomotion rehabilitation.

PHTH 587. Pharmacology. 2 Units.
Introduction to general principles of pharmacology, including actions of commonly used medications on physiological processes related to physical therapy.

PHTH 595. Clinical Imaging. 3 Units.
Covers the various types of imaging used in clinical practice. Educates the future practitioner on the strong and weak points of each type of imaging, what that type of imaging is used for, and how the process is completed start to finish. Covers conventional x-ray, CAT scan, MRI, and MSK ultrasound. Laboratory portion familiarizes the student with MSK ultrasound, including its application and the general interpretation of the image produced.

PHTH 596. Orthopaedics V. 3 Units.
Presents the newest evidenced-based clinical evaluation and treatment applications over the spectrum of the patient population in the field of physical therapy. Emphasizes the specialized area of orthopedic physical therapy.

PHTH 597. Specialized Interventions in Physical Therapy. 3 Units.
Topics include, wellness, home health care, pilates, wound care, geriatrics, lymphedema, bariatrics, reimbursement, women and men’s health, and strain/counterstrain.

PHTH 701. Physical Therapy Affiliation I. 5 Units.
First of three 10-11 week, long-term clinical experiences in an affiliated site under the mentorship of a licensed physical therapist using a standardized assessment tool. Average weekly attendance of 40 hours expected. Clinical settings include acute care, neurorehabilitation, orthopedics, geriatrics, sports medicine and wellness clinics, pediatrics, subacute and long-term care. Program provides preparation for attendance and overall assessment.

PHTH 702. Physical Therapy Affiliation II. 5 Units.
Second of three 10-11 week, long-term clinical experiences in an affiliated site under the mentorship of a licensed physical therapist using a standardized assessment tool. Average weekly attendance expected is 40 hours. Clinical settings include acute care, neurorehabilitation, orthopedics, geriatrics, sports medicine and wellness clinics, pediatrics, subacute and long-term care. Program provides preparation for attendance and overall assessment.

PHTH 703. Physical Therapy Affiliation III. 5 Units.
Third of three 10-11 week, long-term clinical experiences in an affiliated site under the mentorship of a licensed physical therapist using a standardized assessment tool. Average weekly attendance expected is 40 hours. Clinical settings include acute care, neurorehabilitation, orthopedics, geriatrics, sports medicine and wellness clinics, pediatrics, and subacute and long-term care. Program provides preparation for attendance and overall assessment.

PHTH 731. Advanced Orthopaedic Studies. 3 Units.
Specialty track that provides opportunity to pursue, in greater depth, various topics related to current trends in orthopaedic physical therapy; and to develop advanced clinical skills, where appropriate.

PHTH 732. Advanced Neurologic Studies. 3 Units.
Continued development of critical thinking, refinement of previously learned neurologic patient management skills, and introduction to new content supporting neurologic physical therapy practice.

PHTH 733. Advanced General Medicine Studies. 3 Units.
Specialty track that provides opportunity to pursue, in greater depth, various topics related to current trends in general medicine physical therapy; and to develop advanced clinical skills, where appropriate.

PHTH 736. Residency Level Clinical Experience. 1 Unit.
Clinical mentorship under the supervision of a master clinician. Didactic instruction that draws upon a variety of strategies, including case reviews, 1:1 patient mentoring, experiential video analysis and feedback, activities that involve scientific inquiry, and interpretation of the literature and/or clinical experiences.
