The fundamental goal of the Department of Radiation Medicine is to provide optimal care to patients by means of ionizing radiation, much of it using proton therapy—the hospital-based application of which was pioneered by the department. This care rests on the foundation of basic, translational, and clinical research—which, combined with patient education, is always pursued to ensure that patients and their families receive state-of-the-art treatment planning and delivery, follow-up and posttreatment care, and support.

**Chair**
Jerry D. Slater

**Vice chair, Clinical Affairs**
David A. Bush

**Primary faculty**
David A. Bush
Dongrak Choi
Sharon Y. Do
Abiel Ghebemedhin
